Teaching experience

- *Instructor with full teaching responsibilities* — Intermediate Mathematical Economics (Cornell, Graduate, 2016), Decision making and strategy in Economics (PSU, 2012), Introduction to Econometrics (PSU, 2013, 2014, 2015), Knowledge, belief & rationality (NES, 2013)
- *Teaching assistant* — Economics of the corporation (PSU, 2013), Introduction to Macroeconomics (PSU, 2011, 2012), Intermediate Microeconomics (ITAM, 2010), Microeconomic theory (PSU, Ph.D., 2013), Advanced microeconomic theory (PSU, Ph.D., 2014, 2015)

Fellowships

- Rosenberg Liberal Arts Centennial Graduate Endowment in Economics (2014), Bates White Fellowship (2013)

Working Papers

- *Pricing algorithms and tacit collusion*
- *Identification of solution concepts for discrete games*, with Nail Kashahev
- *A bailout-crisis game*, with Bruno Sultanum and Ruilin Zhou
- *Interdependent choices*

Publications

- *Ordinal dominance and risk aversion* (2015) Joint with Bulat Gafarov. *Economic Theory Bulletin*. 3(2):287–298

Seminars & Conferences

- *Pricing algorithms and tacit collusion* — International Conference on Game Theory (SBU, 2016), Pennsylvania Economic Theory conference (poster, PSU, 2016), Cornell University, Warwick University, Collegio Carlo Alberto, CU-PSU Macro workshop (Cornell, 2015)
- *Identification of solution concepts for discrete games* — International Conference on Game Theory (SBU, 2015), World Congress of the Econometric Society (Montreal, 2015), NAMES (Minnesota, 2014)
- *Ordinal dominance and risk aversion* — International Conference on Game Theory (SBU, 2014), Midwest Economic Theory Meetings (IUPUI, 2014)
- *Interdependent choice* — PERC conference (PSU, 2012), Midwest Theory Meetings (MSU, 2013), International Conference on Game Theory (SBU, 2013), AMES (NUS, 2013), LAMES (Colmex, 2013)
- *Computation of SPNE for repeated games with perfect monitoring and public randomization* — Algorithmic Game Theory Summer School (poster, CMU, 2012)
